**Building
GREEN**

Certainly, there are ways to take part in the green movement without expanding your home or building new.

FEATURED PROJECT

⊕ LOCATION: New Canaan, Connecticut

⊕ CONTRACTOR: Hobbs, Inc.

⊕ ARCHITECT: Studio DiBerardino

⊕ DESCRIPTION: Without expanding the footprint, several rooms of this 1980's basic, Colonial style home were updated to create a more authentic historic appearance and to better accommodate today's lifestyles. The family room (shown above) features reclaimed oak flooring, reclaimed wood timber posts and beams, a two-sided fireplace faced with native fieldstone, energy efficient windows, radiant floor heat, and maximum insulation.

On The Boards

DETAILS:

- It's a great time to **get your house in order**. Consider taking on those projects that you may have been putting off for years - upgrading the heating and cooling system, replacing inefficient windows, finishing a basement, or insulating the attic.
- **Need a contractor referral?** Studio DiBerardino has been sharing their database of qualified contractors, craftsmen and material suppliers with clients for years. We can assist you with identifying a repair problem or with how to improve a condition and then put you in touch with the best sources.
- Located in Westport, CT, this issue's **"On The Boards"** project is a restoration of a Tudor style home that was recently damaged by the fall of a large tree. The features of this unique structure include clay roof tiles, decorative half-timbering and brick veneer in a herringbone pattern.
